minepeel™
VolcanicFuse Technology

MINERALIZED ACID COMPLEX

Unique Formulation & Ingredients

The World's First Mineralized Peeling Innovation

VolcanicFuse™ Technology

*minepeel features **VolcanicFuse™**, an innovative and patented technology integrating naturally sourced **volcanic minerals** into a professional peeling formulation. Unlike common industry methods that rely on traditional chemical stabilization, **VolcanicFuse™ uniquely leverages a proprietary interaction between exfoliating acids and pure volcanic-origin minerals**. This groundbreaking fusion naturally dissolves and stabilizes minerals within the peel, creating a highly bioavailable infusion that significantly enhances skin regeneration, structural rejuvenation and overall treatment efficacy.*

minepeel by TWINE Medicals is a groundbreaking professional peeling treatment and ***the first-ever mineralized acid complex*** specifically formulated to deliver multidimensional rejuvenation.

This comprehensive professional formulation synergistically combines **high-potency exfoliating acids, regenerative biomolecules and volcanic minerals** uniquely integrated through our exclusive and patented **VolcanicFuse™ Technology**. Enhanced by advanced buffering, it **exfoliates, regenerates, restructures, nourishes, moisturizes and protect**s the skin, providing exceptional **safety, comfort, minimal downtime and ease of application** — setting a new benchmark in efficacy and patient satisfaction for professional peeling treatments.

TWINE MEDICALS

Composition

01.

Multi-acid Complex

Rejuvenates

*Potent synergistic combination of **7 acids** providing targeted exfoliation and strong biorestructuring action. This **unique acid mix** delivers precise epidermal and superficial dermal stimulation, significantly activating fibroblasts to boost collagen and elastin synthesis, thereby enhancing structural skin rejuvenation.*

02.

Essential Mineral Complex

Boosts

*Vital cofactors of volcanic origin, including **Copper**, **Zinc**, **Manganese**, **Magnesium** that accelerate collagen synthesis, improve skin elasticity and structural integrity, plus **boost cellular energy** — supporting faster regeneration, reduced fatigue and rapid post-exfoliation recovery.*

03.

Hydrolyzed DNA/RNA (PDRN)

Regenerates

*Clinically proven bioactive complex for exceptional anti-aging and regenerative effects. **PDRN** stimulates fibroblast activity, collagen and elastin production, reduces inflammation and promotes **neoangiogenesis**, facilitating the formation of new capillaries for enhanced nutrient delivery and significantly prolonged treatment results.*

04.

Advanced Anti-oxidant & Protective Complex (Ascorbyl Glucoside, D-panthenol, TEA & Arginine)

Protects, Hydrates & Comforts

*Provides **comprehensive protection against oxidative stress**, visibly brightens and rejuvenates the skin, deeply hydrates and actively reinforces the skin's natural barrier. Enhanced by a sophisticated buffering system, this complex guarantees gentle, irritation-free application and **exceptional patient comfort, even for sensitive skin types**.*

Scientifically designed to deliver visible results after the very first treatment, improving patient satisfaction, retention and treatment outcomes, minepeel effectively addresses:

- **Fine lines & wrinkles**
- **Dull, uneven skin texture**
- **Skin laxity & reduced elasticity**
- **Dehydrated and stressed skin conditions**
- **Hyperpigmentation & photoaging**
- **Enlarged pores & acne-prone skin**
